AFFIXATION AND COMPOUNDING IN HAKKA1

Siripen Ungsitipoonporn

Mahidol University

ungsitipoonporn@yahoo.com

Abstract

This paper aims to present the internal structures of words in the Hakka language. Similar to other languages, affixation and compounding are outstanding in Hakka. In general, prefixes and suffixes are bound morphemes which do not occur independently, but in Hakka they sometimes appear as independent forms. Apart from single words, identifying compound words is of particular interest. Compound nouns can be made up of two or three words (characters) which may be a noun, adjective or verb. The results found that some prefixes or suffixes have no meaning such as the prefix $?a^1$ 阿 which is used with kinship or address terms. The most interesting suffixes are used with animal gender (ku 3 牯 'male', ma 2 嫲 'female', and ku 1 公 'male') and in some cases the meaning is not related to the gender of the animal but is merely a component of those morphemes. Such examples are kiɔŋ 1 ma 2 姜嫲 'ginger' and ha 2 kuŋ 1 භ ও 'shrimp'.

¹ This article is supported funding by Thailand research Fund in my research project of "The Hakka grammar as spoken in Bangkok" (Grant No. MRG 5285280140). This research is supported by the Thailand Research Fund (TRF) from March 2009 to March 2011. I would like to acknowledge with thanks Ajarn David Hirsh's comments on the first draft of this manuscript. This paper was presented at the 33rd Annual Conference of Linguistic Society of Napal, 26-27 November 2012, Kathmandu, Nepal.

AFIJACIÓN Y COMPOSICIÓN EN HAKKA

Resumen

Este trabajo tiene como objetivo presentar la estructura interna de las palabras en el idioma Hakka. Al igual que en otras lenguas, la afijación y la composición son excepcionales en esta lengua. En general, los prefijos y sufijos son morfemas concatenados que no ocurren de manera independiente, pero en Hakka a veces aparecen como formas independientes. Además de palabras sueltas, la identificación de palabras compuestas es de particular interés. Los nombres compuestos pueden estar formados por dos o tres palabras (caracteres) que pueden ser un sustantivo, un adjetivo o un verbo. Los resultados muestran que algunos prefijos o sufijos no tienen significado, como el prefijo ?a¹阿, que se utiliza con los términos de parentesco o de dirección. Los sufijos más interesantes se utilizan con el género de los animales (ku³牯 'masculino', ma² 嫲 'femenino', y kuŋ¹ 公 'masculino') y, en algunos casos, el significado no está relacionado con el género del animal, sino que es meramente un componente de esos morfemas. Ejemplos tales son kiɔŋ¹ ma² 姜嫲 'jenjibre' y ha² kuŋ¹ 蜈公 'camarón'.

afijación, prefijos, sufijos, palabras compuestas, Hakka

1. Introduction

Publications dealing with Hakka grammar are quite rare. Previous works have tended to investigate the phonology of Hakka dialects, including Meixian, Xingning, and Jieyang Hakka which are spoken in Thailand and researchers can find good informants giving data (Saengtummachai 2003; Ungsitipoonporn 2007, 2009; So-Bha 2001; Wongwantanee 1984; Shiwaruangrote 2008). One important reason why grammars of other Chinese dialects including Hakka are not interesting or not available is that those Chinese dialects have only spoken language. When they read the Chinese characters in Mandarin they can pronounce in their pronunciation. So the grammar of written language is not different from modern standard Chinese or Mandarin. In fact each Chinese dialect group has many sub-dialects and some details are different.

2. Hakka language and Hakka speakers

Hakka belongs to Hakka group of seven Chinese groups (Mandarin, Wu, Xiang, Gan, Min, Hakka or Kejia, and Yue). According to Luo Xianglin (1933), ancestors of Hakka group originally migrated from the Central Plains to south China during several periods in the past so that now Hakka speakers are scattered in many provinces in southern China such as Guangdong, Guangxi, Fujian, Jiangxi, Hunan, Hainan, Sichuan, and Taiwan (cited from Yan 2006: 166). Hakka speakers in Thailand mostly came from Guangdong province but have many sub-dialects. Meixian and Hongshun sub-dialects are the most common. The usage described in this work is that of Meixian Hakka spoken in Bangkok so we can call this Bangkok Hakka. The situation of Hakka in Thailand is endangered now. Although Hakka descendants are large in number, most cannot speak their mother tongue. Only the elderly can provide good data.

3. Description and explanation

This article is part of my research results in the project of "The Hakka grammar as spoken in Bangkok" (Ungsitipoonporn 2013). This paper is intended to describe the Hakka grammar of current spoken language especially word formation by compounding and affixation. The objective is to describe the affixation and compounding of Bangkok Hakka from my data collected from several contexts and conversations, focusing on colloquial language pronounced by the Hakka speakers who came from Meixian and have lived in Bangkok for a long time. The Chinese characters that are used together with IPA (International Phonetic Alphabet) mean they are pronounced the same as or similar to the informant pronunciation.

4. Compound words in Hakka

A compound word is combined of two or more independent morphemes to make a single word. Its meaning is sometimes predictable but sometimes may not be. The

compounding can be both nouns and verbs. For examples, $pak^5 kuŋ^1$ 伯公 'father's brother and father's father = god of land' and mien⁴ sam^1 面衫 'outside – shirt = coat' are compound nouns because they refer to one single word.

In Hakka, there are several compound nouns and verbs. We classify the compounding according to their properties which mean their parts of speech.

4.1 Compound nouns

Compound nouns are composed of at least two free morphemes. They function as single nouns and act as head nouns in noun phrases. The internal compositions have several types as follows:

	Examples:			
	Noun + Noun ──	Noun or	N+N -	N
(1)	tsok ⁵ pu ⁴	桌布	"ผ้าปูโต๊ะ"	'table cloth'
		table + cloth		
(2)	maw ¹ kiɔk ⁵	毛脚	"รากผม"	'hair root'
		hair + foot		
(3)	t ^h ien ¹ kiuŋ ¹	天弓	"รุ้งกินน้ำ"	'rainbow'
		sky + bow		
(4)	t ^h ew ⁴ jin ²	豆仁	"เมล็ดถั่ว"	'bean seed'
		bean + seed		
(5)	ŋa² sot⁵	牙刷	"แปรงสีฟัน"	'a toothbrush'
		tooth + brush		
(6)	ŋiet ⁶ piaŋ⁴	月	"ขนมสำหรับไว้พระจันทร์"	'moon cake'
		moon + cake		
(7)	tsu³ ŋin²	主人	"เจ้าของบ้าน"	'owner of the house'
		owner + perso	n	

Their structure can be written as follows: modifier (n.) + Head N.

In the examples above, the right side morpheme functions as the head noun and the left side morpheme function as the modifier.

	Adjective + Noun	Noun or	Adj. + N	N
(1)	pʰak ⁶ maw¹	白毛	"ผมขาว"	'grey hair'
		white + hair		
(2)	hon² sam¹	寒衫	"เสื้อคลุมกันหนาว"	'overcoat'
		cold + coat		
(3)	p ^h ak ⁶ tsuk ⁵	白粥	"ข้าวต้ม"	'porridge'
		white + porrio	lge	
(4)	tshon² tshiek6	长席	"เสื่อยาว"	'long mat'
		long + mat		
(5)	saŋ¹ kuo²	生果	"ผลไม้"	'fruit'
		raw + fruit		

Their structure can be written as follows: modifier (adj.) + Head N.

In the examples above, the noun on the right side functions as the head noun and the adjective on the left side function as the modifier.

Verb + Noun →	Noun or	V+N →	N
hok ⁶ kaw ³	学校2	"โรงเรียน"	'school'
	study + schoo	I	
hok ⁶ t ^h oŋ ² ha ¹	学堂 下	"โรงเรียน"	'school'
	study + room	for specific purpose	
son ⁴ mieŋ ⁴ sin ¹ saŋ ¹	祘命先生	" หมอดู"	'fortune-teller'
	tell one's fort	une + teacher/ maste	r
	hok ⁶ kaw ³ hok ⁶ t ^h oŋ ² ha ¹	hok 6 kaw 3 学校 2 study + school hok 6 t h oŋ 2 ha 1 学堂 下 study + room son 4 mieŋ 4 sin 1 saŋ 1	hok 6 kaw 3 学校 2 "ໂรงเรียน" study + school hok 6 t h o η^2 ha 1 学堂 下 "โรงเรียน" study + room for specific purpose

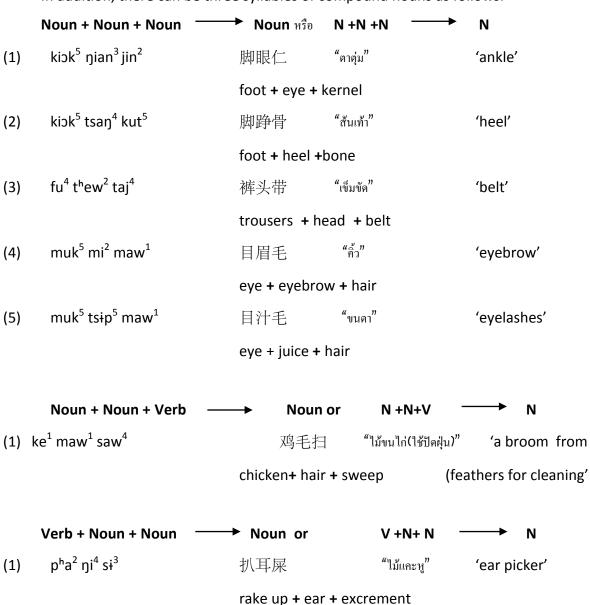

² Literary language.

91

Their structure can be written as follows: modifier (v.) + Head N.

In the examples above, the verb functions as the modifier which is placed on the left side of the head noun.

In addition, there can be three syllables of compound nouns as follows:

4.2 Compound verbs

Compound verbs are composed of two morphemes. They seem to be a verb plus object and are corresponding to an intransitive verb in English.

ได้ยิน

Verb + Verb or verb complement

(1)
$${\sf fat}^{\sf 5} \sin^4$$
 发性 'angry' ${\tt lnss}$ produce + temper

听到

hear + used as a verb complement to indicate the result of an action

'to hear'

4.3 Compound adjectives

than¹ taw⁴

(3)

Compound adjectives are composed of at least two morphemes which are adjectives plus verbs or nouns. This process can produce some new adjectives.

(1)	t ^h aj ⁴ foŋ ¹	大方	'magnanimous'	"ใจกว้าง"
		big + locality		
(2)	haw³ t ^h aŋ¹	好听	'melodious'	"ไพเราะ"
		good + hear		
(3)	haw ³ sɨt ⁶	好食	'delicious'	"อร่อย"
		good + eat		
(4)	t ^h aj ⁴ sɨt ⁶	太食	'greedy'	"ຕະກລະ"
		greatest + eat		
(5)	tet ⁵ ŋin ² siak ⁵	得人惜	'lovely'	"น่ารัก"
		gain + human	+ love	
(6)	t ^h aj ⁴ saŋ ¹	大声	'loud'	"(เสียง)ดัง"
		big + sound		

5. Affixation

There are both prefixes and suffixes in Hakka language. In general, prefixes and suffixes are bound morphemes and do not occur independently. In Hakka, however, prefixes and suffixes may sometimes appear as independent forms but their meanings are not exactly the same when they act as prefixes or suffixes. For example, for the prefix law³ 老, its literary meaning is "old" but when it functions as a prefix, its meaning is not related to 'old'.

5.1 Prefixes in Hakka language

Prefix ?a¹ 阿 is a prefix used with kinship terms and person names to identify a closed relationship or to express intimacy with somebody.

Examples:

(1)	?a¹ pa¹	阿爸	''พ่อ''	'father'
(2)	?a¹ me¹	阿姆	"ແມ່"	'mother'
(3)	?a¹ ko¹	阿哥	''พี่ชาย''	'older brother'
(4)	?a¹ saw³	阿嫂	''สะใภ้''	'female in-law'
(5)	?a¹ kap⁵	阿甲	''อากับ (ชื่อคน)''	'name of people'
(6)	$7a^1 p^h o^2$	阿婆	''ย่าหรือยาย''	'grandmother'
(7)	?a¹ tsi³	阿姊	"พี่สาว"	'older sister'
(8)	?a¹ pak⁵	阿伯	"ନ୍ଧ୍ୟ"	'uncle'

Prefix ʔan³ 恁 is placed before verbs or adjectives in order to emphasize a stronger meaning than normal.

Examples:

(1)	?an³ sin¹ kʰu³	恁辛苦	"ลำบากเหลือเกิน"	'so difficult'
(2)	?an³ tuj⁴	恁对	''พอดีเหลือเกิน''	'so accidental'
(3)	?an³ hiɔŋ³	恁响	"คังเหลือเกิน"	'so loud'
(4)	?an³ kʰiɔŋ² tsoŋ⁴	恁强壮	''แข็งแรงเหลือเกิน''	'so strong'
(5)	?an³ tiam³	恁惦	"เฉยจัง"	'so calm'
(6)	?an³ to¹	恁多	"มากมายเหลือเกิน"	'so much'
(7)	?an³ ti³ tsʰien²	恁抵钱	"มีค่าเหลือเกิน"	'so precious'
(8)	?an³ tʰaj⁴	恁 大	''ใหญ่เหลือเกิน''	'so big'
(9)	ʔan³ tsʰɨ⁴ tsʰaj⁴	恁自在	''อิสระเหลือเกิน''	'so free'
(10)	?an³ kaw¹	恁高	"สูงจัง"	'so high'

Prefix law³ 老, has the literary meaning of "old" but when it functions as a prefix, its meaning has changed and is not related to the original. Occasionally, it means respect to someone or a senior person when it precedes kinship terms and nouns.

Examples:

(1)	law ³ p ^h o ²	老婆	"กรรยา"	'wife'
(2)	law³ ŋin²	老人	"คนแก่"	'old people'
(3)	law³ pak⁵	老伯	''คนแก่''	'elderly'
(4)	law³ kuŋ¹	老公	"สามี"	'husband'
(5)	law³ t ^h aj¹	老弟	''น้องชาย''	'younger brother'
(6)	law³ moj⁴	老妹	"น้องสาว"	'younger sister'
(7)	law³ sɨt ⁶	老实	"ชื่อสัตย์"	'honest'
(8)	law³ sɨn²	老成	''ระมัดระวัง''	'careful'
(9)	law ³ sin ¹ saŋ ¹	老先生	"คุณครูอาวุโส"	'old teacher'

Prefix ${\sf law}^4$ $\not\approx$, has no meaning in this situation but is used to complete a noun morpheme.

Examples:

(1)	law ⁴ haj ³	老蟹	"ٳۣ"	'crab'
-----	-----------------------------------	----	------	--------

Prefix m^2 唔 has a literary meaning of "not" and is used in a negation sentence. We called it a prefix when it precedes some verbs or adjectives, when it becomes a single noun.

Examples:

not + see

not + bright

not + same

(4)
$$\dot{m}^2 \, p^h ian^2$$
 唔平 "『l』 $\dot{n} + \iota f e u = u f u f e s e$ " 'rough'

not + flat

not + clear

(6)
$$\dot{m}^2 ja\eta^2$$
 唔赢 " $l_{1}\dot{l} + yuz = u \mathring{d}$ " 'to be defeated'

not + win

not + same

(8)
$$\dot{m}^2 \text{ woj}^4 \text{ nan}^2$$
 唔会难 "ᡀ + ขาก = ฆ่าข" 'easy'

not + difficult

(9)
$$\dot{m}^2 ki^4 tet^5$$
 唔记得 "礼 $\dot{\imath} + \hat{\imath}$ 九尚 = ੈ $\ddot{\imath}$ " 'forget'

not + remember

Prefix jiw¹有, has a literary meaning of "to have" but when it precedes a noun, it changes to an adjective.

Examples:

(1)
$$jiw^1 ts^h ien^2$$
 有钱 " $ij + i ju = 5 วช$ " 'rich'

have + money

have + disease

Prefix $fat^5 \not\Xi$, has a literary meaning of "become, get into a certain state" but when it precedes a noun, it changes to a noun.

Examples:

(2)
$$fat^5 ts^hoj^2$$
 发财 İnsau 'get rich'

5.2 Suffixes

Suffixes used to identify gender have three forms. Suffixes ku^3 4 and $ku\eta^1$ 4 are used to indicate male, while suffix ma^2 4 is used to indicate female. In general a modifier in the Hakka language is placed on the left side of the head noun but only for the gender it is placed on the right side of the head noun so we classify it into suffixes class.

³ Literary language.

(2) njiw² ma² 牛 嫲 ''วัวตัวเมีย'' 'cow' cow + suffix (female) kew³ ma² "หมาตัวเมีย" 狗嫲 'female dog' (3) dog + suffix (female) $ap^5 ma^2$ 鸭嫲 "เป็ดตัวเมีย" (4) 'female duck' duck + suffix (female) non⁴ ma² 戆 嫲 "คนบ้า (เพศหญิง)" (5) 'a women who is mad' mad + suffix (female) ke¹ ku³ (6) 鸡牯 ''ไก่ตัวผู้'' 'cock' chicken + suffix (male) niw² ku³ (7) 牛 牯 "วัวตัวผู้" 'ox' ox + suffix (male) (8) kew³ ku³ 狗 牯 ''หมาตัวผู้'' 'male dog' dog + suffix (male) ηοη⁴ ku³ (9) 戆 牯 "คนบ้า (เพศชาย)" 'madman' mad + suffix (male)

(10) ?ap⁵ kuŋ¹ 鸭 公 "เปิดตัวผู้" 'male duck'

duck + suffix (male)

(11) ke¹ kuŋ¹ 冯 公 "ไก่ตัวผู้" 'cock' chicken + suffix (male)

Suffix ${\rm ma}^2 \ {\rm jm} \ {\rm has} \ {\rm a} \ {\rm meaning} \ {\rm that} \ {\rm is} \ {\rm sometimes} \ {\rm not} \ {\rm related} \ {\rm to} \ {\rm gender} \ {\rm but} \ {\rm it} \ {\rm is} \ {\rm used} \ {\rm to} \ {\rm complete} \ {\rm a} \ {\rm noun}.$

Examples:

(1) kion¹ ma² "ขิง" 姜嫲 'ginger' taw¹ ma² (2) "มืดโต้" 'kitchen chopper' 刀嫲 $li^2 ma^2$ (3) 笠嫲 "งอบ" 'a bamboo hat' set⁵ ma² (4) 虱嫲 "เหา" 'louse'

(5)	sat ⁶ ma ²	舌嫲	''ลิ้น''	'tongue'
(6)	li ¹ ma ²	鯉嫲	"ปลาหลีฮื้อ''	'carp'
(7)	sɔk ⁶ ma²	勺嫲	"กระบวย"	'ladle'

Suffix $ku \mathfrak{y}^1 \not \bigtriangleup$ has a meaning that is sometimes not related to gender but it is used to complete a noun.

Examples:

(1)	ni¹ kuŋ¹	蚁公	" _{ນຄ} "	'ant'
(2)	ha² kuŋ¹	蝦公	ปู่ง เเล็วง	'shrimp'
(3)	san¹ ha² kuŋ¹	山蝦公	''แมงป่อง''	'scorpion'
(4)	hian³ kuŋ¹	蝳公	''ใส้เคือน''	'earthworm'

Suffix ku^1 th has a meaning that is sometimes not related to gender but it is used to complete a noun.

Examples:

(1)	si ¹ ku ¹	須姑	"หนวด"	'moustache'
(2)	nen ⁴ ku ¹	乳姑	"เต้านม"	'breast'

Suffix $ha^1 T$, when it follows a noun, has a meaning which is similar to indicating location and it acts as preposition.

		N + suffix		
(1)	wuk ⁵ ha ¹ (k ^h ua ¹)	屋下	"(ที่) บ้าน"	'(at) house'
(2)	?am¹ ha¹	庵下	"(กี่) วัด"	'(at) temple'
(3)	hok ⁶ t ^h oŋ² ha1	学堂下	(ที่) โรงเรียน''	'(at) school'

Examples:

N + suffix ?e² 里

				
(1)	ka ¹ ?e ²	家里	''ในบ้าน''	'in a house'
(2)	sim¹ (tu¹)?e²	心肚里	''ในใจ''	'in a heart'
(3)	su ³ ?e ²	手里	"ในมื้อ"	'in a hand'
(4)	saŋ² ŋe²	城里	''ในเมือง''	'in the city'
(5)	t ^h oj ⁴ ?e ²	袋里	''ในกระเป๋า''	'in a bag'
(6)	ho² ʔe²	河里	''ในแม่น้ำ''	'in a river'
(7)	t ^h ien² ne²	田里	''ในนา''	'in a rice field'
(8)	san ¹ ?e ²	山里	''ในหุบเขา''	'in a valley'
(9)	wok ⁶ ?e ²	鍋里	"ในกระทะ"	'in a pan'
(10)	su ⁴ lim ² me ²	树林里	''ในป่า''	'in a forest'
(11)	suj ³ ?e ²	水里	''ในน้ำ''	'in water'

Suffix $t^h ew^2 \not \perp$ has a literary meaning of "head" but when it follows a noun, its function changes to complete a noun morpheme.

	cc.	.n	- 2	1/
N +	suffix	t e	w-	头

(1)	kut ⁵ t ^h ew ²	骨头	"กระคูก ''	'bone'
(2)	ŋit ⁵ tʰew²	日头	"พระอาทิตย์''	'sun'
(3)	kuon ⁴ t ^h ew ²	罐头	"กระป้อง"	'tin, canister'
(4)	kin ¹ t ^h ew ²	肩头	''หัวใหล่''	'shoulder'
(5)	kiɔk ⁵ t ^h ew²	钁头	"จอบ" ["]	'hoe'
(6)	wok ⁶ t ^h ew ²	锅头	"กระทะ"	'pan'

(7)	sak ⁶ t ^h ew ²	石头	"หิน"	'stone'
(8)	pu³ t ^h ew²	斧头	"ขวาน"	'axe'
(9)	tsem ¹ t ^h ew ²	砧头	"เขียง"	'chopping block'
(10)	tsɨm³ tʰew²	枕头	"หมอน"	'pillow'

Suffix tsi^3 $H^{\frac{4}{30}}$ $?e^2$ \neq follows a noun in order to complete a noun morpheme. The pronunciation of this suffix is not exactly the same but it sometimes depend on the final consonant of the former syllable. However, it is usually pronounce as tsi^3 or $?e^2$.

		N + suffix		
(1)	ŋ³ tsɨ³	女子	"ลูกสาว"	'daughter'
(2)	ts ^h i¹ tsɨ³	妻子	"ภรรยา"	'wife'
(3)	sɨn² tsɨ³	臣子	"ขุนนาง"	'bureaucrat'
(4)	jan ⁴ tsɨ ³	晏子	" ກູ ຕ"	'diplomatic agent'
(5)	sɨn¹ ne³	身子	"ร่างกาย"	'body'
(6)	san ⁴ ne ³	扇子	''พัด''	'fan'
(7)	lam² me³	篮子	"ตะกร้า"	'basket'
(8)	sam² me³	蝉子	''จ๊กจั่น''	'cricket'
(9)	η² le³	鱼子	"ปลา"	'fish'
(10)	jap ⁶ ʔe³	叶子	''ใบไม้''	'leaf'
(11)	lu² ʔe³	炉子	"ເ ທ າ"	'stove'
(12)	laj ⁴ ʔe ²	孻子	"ลูกชาย"	'son'
(13)	sen ¹ ?e3	星子	"คาว"	'star'
(14)	wo² pit ⁵ ?e³	禾鴓子	"นกกระจอก"	'sparrow'
(15)	tsa ¹ ?e ³	遮子	";່ານ"	'umbrella'
(16)	p ^h an² ʔe³	盘子	"จาน"	'plate'
(17)	kuo³ ʔe³	果子	"ผลไม้"	'fruit'
(18)	t ^h u ⁴ ʔe ³	兔子	"กระต่าย"	'rabbit'
(19)	p ^h oŋ¹ ʔe³	蚌子	"หอย"	'shell'

Dialectologia 13 (2014), 87-105.

ISSN: 2013-2247

(20)	ŋiun² ʔe³	银子	"เงิน"	'silver'
(21)	p ^h aj² ʔe³	牌子	''ป้าย''	'billboard'
(22)	ts ^h a ¹ ?e ³	车子	" " " " "	'car'
(23)	maw ⁴ ?e ³	帽子	"หมวก"	'hat'
(24)	kam¹ ʔe³	柑子	"สัม"	'orange'
(25)	moj ⁴ ?e ³	妹子	"ลูกสาว"	'woman'

Suffix ${\sf tsaj}^3 \not\vdash {\sf follows}$ an adjective in order to complete a noun morpheme. Most of them mean female.

Examples:

		adj. + suffix		
(1)	liaŋ⁴ tsaj³	靓仔	"คนหล่อ"	'handsome man'
(2)	liaŋ⁴ moj⁴ tsaj³	靓妹仔	"คนสวย"	'beautiful girl'
(3)	so² tsaj³	傻仔	"คนโง่ (ชาย)"	'stupid man'
(4)	se ⁴ tsaj ³	细仔	''เด็กชาย''	'boy'
(5)	moj ⁴ tsaj ³	妹仔	"เด็กหญิง"	ʻgirl'

Suffix ko¹ 哥 follows a noun in order to complete a noun morpheme.

(1)	hew² ko¹	猴哥	"ลิง"	'monkey'
(2)	wat ⁶ ko ¹	順哥	''ปลาคุก''	'catfish'
(3)	wu¹ liaw⁴ ko¹	乌鹩哥	"นกขุนทอง"	'grackle'
(4)	sa² ko¹	蛇哥	";,	'snake'
(5)	se ² lo ² ko ¹	蛞螺哥	"หอยทาก"	'garden snail'

6. Conclusion

Compounding in Hakka can be found as three types: compound nouns, compound verbs, and compound adjectives. Compound nouns are quite clear whereas compound verbs can be identified to be verb-object compounds. This study shows ten suffixes and seven prefixes. Some prefixes or suffixes have no meaning but functions to complete a noun morpheme. Some suffixes act as prepositions such as suffix $?e^2$ and suffix ha^1 . The most interesting finding is that suffixes used to identify gender in Hakka have three morphemes. Suffixes ha^3 and hakka are used to indicate male while suffix ha^2 is used to indicate female.
